

# CATARACT SURGERY OPTIONS

**Light Adjustable Lens Package\*:** A unique option for patients looking for post-surgical customization of their IOL vision outcomes. This package includes the Light Adjustable Lens and all post-surgical customization appointments.

**Premium LifeStyle Package\* (Cataract and Clear Lens Exchange):** An ideal option for patients who wish to reduce their dependency on corrective lenses after cataract surgery. We offer the most advanced intraocular lens (IOL) options to meet the needs of your lifestyle and ocular health.

**Astigmatism or Monovision (AMP)\*:** A customizable treatment program designed for patients who wish to reduce their dependency on corrective eyewear for distance vision, astigmatism correction, or monovision correction.

**LenSx (Laser-Assisted Cataract Surgery):** This option is for patients who want to take advantage of the newest femtosecond laser-assisted cataract surgery. There will be corneal relaxing incisions to reduce astigmatism. Bi-focal or progressive glasses may be needed after surgery.

**Standard Traditional IOL (Intraocular Lens):** This package includes a standard lens that does not correct astigmatism, intermediate or near distances. Bifocal or progressive glasses may be needed after surgery.

\* Included with these packages: Femtosecond (LenSx) laser-assisted cataract surgery and refractive touch-up as needed and approved by your surgeon.

**New Light Adjustable Lens Technology Package:** The RxSight® Light Adjustable Lens (LAL) is the first and only FDA approved intraocular lens implant (IOL) that can be adjusted after surgery. It allows you to test-drive your vision and, working with your surgeon, lock-in your preferred vision truly designed for your unique visual outcomes. It offers a way to correct distance vision for patients wanting to reduce their dependence on glasses for distance. This package would also include options for patients seeking blended vision or monovision correction.

\* It is important to note that while your health insurance typically covers the cost of conventional surgery and standard monofocal lens package, some out-of-pocket expenses are associated with advanced technology lenses and packages. Talk to your surgical counselor about payment plans to make a one-time investment to achieve better vision.
